

Pool maintenance log

Record the result before the treatment. Blank means not tested, not zero.

Pool volume / estimate method

Pump model / regular setting

Filter model / media

Test kit / reagent dates

Water tests

Date	Time	Method	FC ppm	TC ppm	pH	TA ppm	CH ppm	CYA ppm	Salt ppm	Notes

FC: free chlorine. TC: total chlorine. TA: total alkalinity. CH: calcium hardness. CYA: cyanuric acid.

Equipment and treatment record

Compare pressure at matching pump settings and modes. Preserve earlier clean references.

Equipment observations

Date	Time	RPM / flow target	Mode	PSI	Flow GPM	Observation / work	Next action

Product additions and follow up

Date	Time	Product	Strength	Quantity	Units	Reason	Next check / result

Use the applicable product label and equipment instructions. This record does not calculate doses or establish swimming safety.
