

Weekly pool checklist

Keep more frequent water checks going between weekly sessions.

Week of / person responsible

- ☐ **Inspect pool and access**
Visibility, water level, debris, damage and unusual conditions.
- ☐ **Record water tests**
Readings, units, method and time. Verify before adjusting.
- ☐ **Observe circulation**
Pump setting, mode, filter pressure and return flow.
- ☐ **Remove floating debris**
Empty collection baskets using the correct shutdown procedure.
- ☐ **Brush suitable surfaces**
Use equipment compatible with the pool finish.
- ☐ **Vacuum or use the cleaner**
Check collection bags, baskets and missed areas.
- ☐ **Assess filter service need**
Use its manual and a matching clean pressure reference.
- ☐ **Make justified adjustments**
Record product, strength, amount, units and required follow up.
- ☐ **Verify the final state**
Normal schedule, valve mode, flow and no unsafe leaks.

Next action / due time

A weekly checklist does not replace frequent water testing or an urgent response to unsafe conditions.
